TO WHOM IT MAY CONCERN:

Dear **Hiring Team**,

As an admirer of the impressive work being done by the team at your **[Multinational Company]**, I'm delighted to submit my application for the Entry-Level Application. As a recent graduate from the Gujarat Technological University with a B.E. in Computer Science and Engineering, I'm confident that my knowledge of HTML, CSS, JAVA, MySQL, SQLite, Oracle, JavaScript, PHP, C/C++, Android Application Development, Website Development/Designing, UX Design, Project Management and precise attention to detail would make me an asset to the team.

I'm very much interested in beginning a career in the Software Developer field, as I am motivated by working on technical challenges and I enjoy being given specifications for features to add or problems to solve and figuring out the best and most effective course of action. I have always been keen to learn a new set of skills I believe I'll make an excellent individual and Teamwork quality for the company, plus this is my following Personal project accomplishments:

- Quick Compare (Skills used - HTML, CSS, JS, PHP, MySQL Server).
- Score! The Sports (Skills used - Java, Flutter, Android Studio, AVDs, Firebase, DB SQLite).
- Adventurous World Travel (Skills used - HTML, CSS, PHP, MySQL Server, Bootstraps).

I feel like your organization will help me to improve my knowledge & a set of new skills and being a quick learner, I can assure you that I can contribute much more to the organization and further up can help you achieve your upcoming goals.

Could we set up a time to discuss your needs?

Best Regards,

Smit Panchal.
